Jl. Karang Rejo Gg. Baru 6B, Kel. Wonokromo, Kec. Wonokromo, Surabaya, Jawa Timur, Indonesia

I am a Web Developer with experience in web-based system development and e-commerce digital marketing. I have experience managing 100+ product catalogues on Amazon and eBay platforms, conducting market research and competitor analysis, and developing pricing strategies that helped increase product visibility by up to 40%. In web development, I am accustomed to building systems using frameworks like Laravel and Yii2, managing operational data for 50+ users, and optimising application performance by up to 30–40% more efficiently. Results-oriented, I combine technical expertise and business understanding to create digital solutions that are responsive, user-friendly, and support data-driven business growth.
